INTRODUCTION

From the management team we have reached some conclusions. In our project all of us have a similar knowledge of everything, and we have to deal with these limitations in order to achieve our goals. Hor that purpose, we have divided the team into several groups with different responsibilities:

- Planning team: Lucía Gutiérrez (management leader), Lucía Corpas
- Quality team: Lucía Gutiérrez, Guillermo Pérez-Peña
- Modeling team: Inbal Hasson (technical leader), Jorge Velázquez
- Design team: Inbal Hasson, Jorge Velázquez
- Testing team: Lucía Corpas, Guillermo Pérez-Peña, Javier Zafra
- Requirement team: Javier Jordán, Javier Zafra, Alfonso Martínez
- Risks team: Javier Jordán, Alfonso Martínez
- Programmer team: all of us

PERIOD 1

As we are very inexperienced in this kind of work, we have decided that the best planning strategy is the agile method, because it provides a great reaction to the changes it may happen during the development of the project.
In Trello, we have created the tasks that we have to do, in this first period we have decided the following:

PERIOD 2

We have advanced a lot in the requirements part, so the next thing to do is developing in the modeling part as we keep going deep into the requirements part. So, the User stories table and the use cases diagram have been moved to 'ready for review' as they are almost finished.
